

I love computers I find them fascinating and have endless patience with them and the people who use them. At last count, I have 14 computers of my own, including laptops, desktops, and have or have had many tablets, and mobile phones. They have a large variety of Operating Systems including all of the most used Windows editions, Apple, Linux and Ubuntu. I am familiar with all popular software title and even more that are unpopular. Even when I am not assisting someone else I am learning more about operating systems, and other software. I am considered a software expert by a local Computer Shop owner. I started my own business and contract out to other businesses as needed to be of more benefit to my customers. I do mostly coaching for software use, operating systems, and Malware- or how to avoid it or recover from it. I stress making regular backups of your data, and will be happy to discuss the different ways to do this with you - so you can decide what method would be best.

Animals of all kinds have been a huge part of my life. 10 years ago, [and 70 pounds] ago I was still breaking and training horses. I've seen most of the state of Arizona and some of California from the back of a horse, trained and competed in many disciplines including dressage, hunter-jumper and barrel racing. I gave horsemanship lessons for many years before health concerns drove me indoors.

I've been married to Mike "Cowboy" McCarty since 1995. I adopted him in 1993. We moved to RCSD in 2010. Mike was an 'over the road' flatbed truck driver and I only saw him every 4-6 months. Now I am enjoying him being home since he decided to find a local, non-trucking job with Sam's Club.

I'm not attracted to 'shiny' stuff, but brightly colored things will keep me entertained for hours.
